

Twitter widget

Use the Twitter widget to add a Twitter feed to your site

Twitter widget FAQs

Q: Why am I not seeing any tweets when I set the Twitter widget to my username?

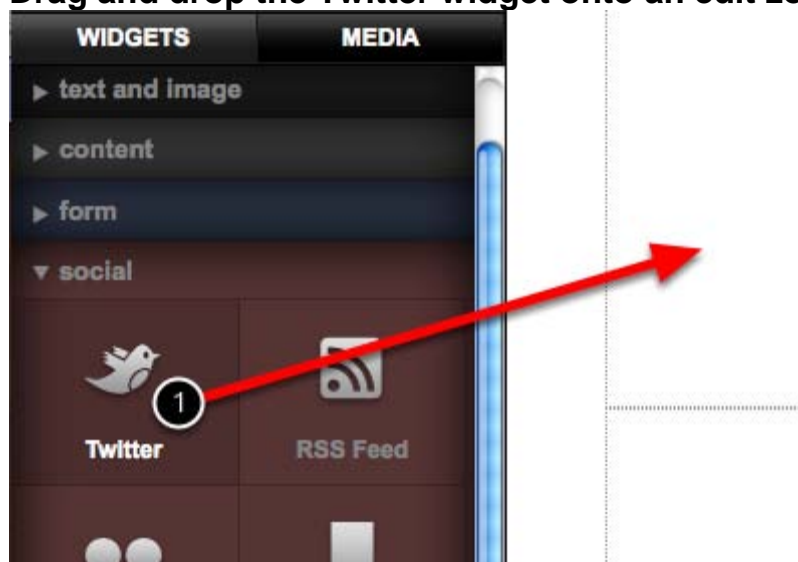

A: In most cases this is caused by not tweeting anything for 7 days or more. Only tweets up to 7 days old can be searched for. This is a restriction of the Twitter API.

Locate the Twitter widget

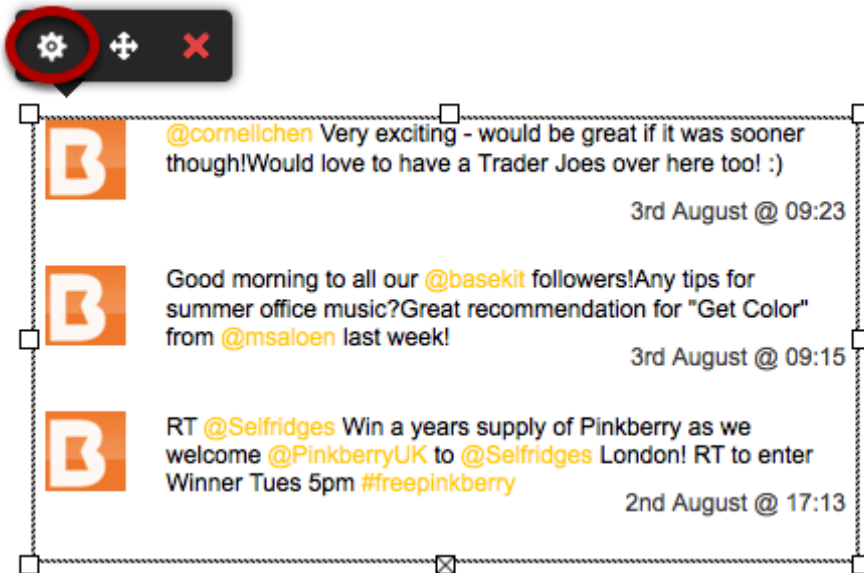

Click on the widgets tab (1) and then on the Social tab (2). You may need to scroll down to see the Twitter widget.

Drag and drop the Twitter widget onto an edit zone

When you drop the widget, the default Twitter feed will appear.

Click the edit icon to change the settings

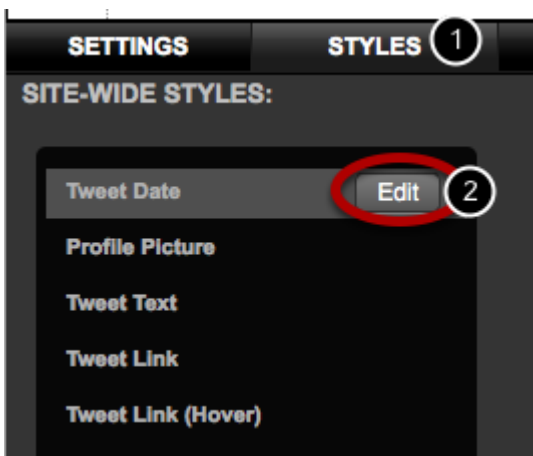

Set the search term

Type a search term into the search field (1) and hit the return key on your keyboard.

Change the appearance of the widget

Click on the styles tab (1) to display the widget styles controls. Click on a text style Edit button (2) and then use the controls to adjust the style.
